

# Viva la V-Propolis!

Bee fascinated by Propolis' antibacterial, antifungal and even antiviral properties, which function like a premium natural antibiotic.

It seems that ancient Egyptians weren't the only ones who commonly mummify their dead. For years, scientists have discovered that bees, too, prevent decay from occurring within their hives by mummifying dead carcasses with propolis and beeswax. If a dead foreign body like that of a small insect finds its way into the hive, the bees would seal the carcass with propolis in an attempt to render it odourless and harmless while preventing microorganisms from attacking it.

### Propolis' Key Properties

Essentially, propolis is a sticky natural resin collected from tree barks and leaves by worker bees to protect their hives against invading bacteria, viruses and fungi. It is used to seal their hives, protecting it from outside contaminants. Placed at the entrance of the beehive, propolis also functions as a natural sterilizer to prevent dust particles, parasites and diseases stemming from bacteria and viruses from entering and wreaking harm.

With its antibacterial, antioxidant properties, propolis is particularly beneficial to those with inflammatory problems or flu as propolis helps destroy viral infections. In effect, propolis seals up the virus and prevents it from spreading from one part of the body to the other, thereby giving our bodies a chance to resist against it. Propolis is also known to boost energy levels and relieve fatigue. It aids in the production of new cells, especially red blood cells, and is thus recommended for anemic patients.

Propolis is often used for colds, sore throats, tonsilitis and skin problems. It promotes the healing of wounds and bruises, stomach ulcers, burns, gum disease, low blood pressure, giddiness, anemia, respiratory problems, and enhances the body's natural resistance.

#### **Avance V-Propolis' Premium Grade Standards**

Prepared via the Valeo Process, a unique method which blends honey, pollen and pure spring water (instead of alcohol or normal water) to extract the active compounds of propolis in its natural bio-active state, Avance V-Propolis offers you natural resistance builders in its actual potency and vitality. Made in the scenic and wholesome environment of MacKenzie Country, New Zealand, V-Propolis is certified organic by Agriquality New Zealand Limited.

V-Propolis has also been certified by the Hagalis Crystal Analysis, an independent German quality assessment institute which awarded it 23 out of a full score of 24 points, confirming its premium quality and its benefits for good health (See Fig. 1).

#### **Recommended Consumption Tips\***

- For regular health maintenance  
Take 20 drops per day on an empty stomach (for adults).  
Take 8-10 drops a day (for children). Best taken before breakfast.
- If you have a fever or cough  
Supplement your diet by consuming 20-40 drops, 3 times a day.
- Patients in need of building up their body's red blood cell count  
Take 40-60 drops of V-Propolis, 2-3 times a day.

\* Individuals' conditions may vary.  
It is best to seek the advice of our bWL  
nutritional consultants to obtain tailor-made V-Propolis  
consumption recommendations.

- To enhance body's natural resistance  
General Maintenance:  
Take 1 satchet of BifiMax Excellent, 20 drops of V-Propolis, 1 capsule of ImmuGain and consume with SangoCal water. If possible, breathe in the goodness of negative ions via UberAir Space.  
For increased enhancement:  
Consume the above in the morning, afternoon and night.
- If you are on medication  
Consume V-Propolis only 2 hours after medication.
- To boost health before undergoing surgery  
Take 1 satchet of BifiMax Excellent in the morning, 40 drops of V-Propolis morning and night, 2 capsules of ImmuGain in the morning, 1 capsule of PhosChol 565 in the morning and afternoon, and consume with SangoCal water.

#### **Bit O' Trivia!**

V-Propolis enhances our body's natural resistance to protect us against harmful elements. Incidentally, the word "Propolis" has Greek origins, meaning 'Before the City' or 'Defender of the City'.
